NOTES:

Variables that impact working pressure include the type of fluid being conveyed through the hose, its temperature, pressure, and time. Field testing is recommended. Burst pressure is greater than or equal to three times the working pressure.

Temperature range: -40°F (-40°C) up to 248°F (120°C), depending on the product being conveyed. For sterilization purposes: up to 302°F (150°C) maximum for 30 minutes.

When products are used as part of an assembly, the pressure ratings of fittings may be less than hose pressure ratings above. Please consult your sales representative.
